Hello,

The U.S. Environmental Protection Agency - Great Lakes National Program Office, in partnership with the Ohio Environmental Protection Agency, Summit Metro Parks, FirstEnergy, the County of Summit, Summit County Council, the City of Akron and the City of Cuyahoga Falls, are developing plans to: (1) remove the Gorge Dam, located on the Cuyahoga River in northeast Ohio; and 2) remediate the contaminated sediment in the impoundment upstream of the dam.

Details on the project and opportunity for consultation are enclosed for your review.

Thank you,

Chris Klinkhamer  
U. S. Environmental Protection Agency  
Great Lakes National Program Office
